Examination of Application #10/711,472

1. Claims 1-6, 8-20, 22, and 23 of application 10/711,472, are pending in the application. This communication is in response to the amendment received 20-May-2008. Claims 7 and 21 are canceled. The following rejections are presented for consideration.

Claim Rejections under 35 U.S.C. § 112, 2nd Paragraph

2. Claims 1 and 15 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1 – line 7 and claim 15 – line 10 Change “the key data” to --the at least one key data--.

Claim 15 – line 7 Change “each of the test patterns” to --each of the at least one test patterns--.

Claim Rejections under 35 U.S.C. § 101

3. 35 U.S.C. 101 reads as follows:
Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter or any new and useful improvement thereof, may obtain a patent therefore, subject to the conditions and requirements of this title.

- 3.1 Claims 15-20, 22, and 23 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter.

Art Unit: 2128

3.2

****>**Descriptive material can be characterized as either “functional descriptive material” or “nonfunctional descriptive material.” In this context, “functional descriptive material” consists of data structures and computer programs which impart functionality when employed as a computer component. (The definition of “data structure” is “a physical or logical relationship among data elements, designed to support specific data manipulation functions.” The New IEEE Standard Dictionary of Electrical and Electronics Terms 308 (5th ed. 1993).) “Nonfunctional descriptive material” includes but is not limited to music, literary works, and a compilation or mere arrangement of data.

In view of the aforementioned requirement, the Examiner respectfully contends that the claim language of claims 15-20, 22, and 23 do not claim a practical application, that language claiming a computer-readable storage medium having software for storing a computer readable program executing an IP characterization method on a computer system. The medium holding the software is determined to recite data embodied on the computer-readable medium.

However, the data does not impart functionality to either the data as claimed or to the computer. As such, the claimed invention recites non-functional descriptive material, *i.e.*, mere data. Non-functional descriptive material is merely carried on the medium, it is not structurally and functionally interrelated to the medium, and thereby does not manipulate, or execute, appropriate subject matter, and thus cannot constitute a statutory process (MPEP Section 2106).

The examiner respectfully suggests the following language to overcome this rejection. In claim 15, in the preamble, “A computer readable storage medium having computer executable instructions, which when executed on a computer system, perform an IP characterization method on the computer system, the IP characterization method comprising:”.

Claim Objections

4. Claims 2-6, 8, 9, 16-20, 22, and 23 are objected to for being dependent on a rejected base claim.

Allowed Claims

5. Claims 1-6, 8-20, 22, and 23 are deemed allowable over the prior art at this time, pending resolution of any rejections noted above, because the prior art does not specifically disclose the claimed method of finding paths in an IP component.

Response Guidelines

6. A shortened statutory period for response to this action is set to expire **3 (three) months and 0 (zero) days** from the date of this letter. Failure to respond within the period for response will cause the application to become abandoned (see MPEP 710.02, 710.02(b)).
